

Shipping & Domestic Fulfillment Policy

Document Ref: ORN-SP-2026-V1

Effective Date: July 2026

At Ornativa, we recognize that luxury jewelry demands exceptional handling, reliable transport, and rigorous transit security. This document details our operational frameworks, timeline matrices, cost provisions, and insurance coverages regarding domestic fulfillment across the Republic of India.

1. Dispatch & Delivery Timelines

Orders are dispatched from our fulfillment facility within 24 to 48 hours of successful payment authorization and security clearance. Delivery schedules vary based on destination typography and proximity to primary tier-1 logistics hubs:

Region Type	Delivery Timeline	Geographic Coverage
Metro Cities	2–4 Business Days	Mumbai, Delhi-NCR, Bengaluru, Chennai, Kolkata, Hyderabad
Other Cities	4–7 Business Days	Tier-2 and Tier-3 urban centers, state capitals
Remote Areas	7–10 Business Days	North-East states, J&K, remote island locations, rural zones

Note: Made-to-Order or customized jewelry selections require an additional 10–14 business days for artisanal crafting prior to entering the dispatch lifecycle.

2. Shipping Tariff Structure

Fulfillment fees are derived automatically during checkout based on the aggregate valuation of the items within the active cart session:

- Orders Valued Above ₹5,000:** Eligible for **Complimentary Insured Shipping**. No processing fees or hidden logistics surcharges are levied.
- Orders Valued Below ₹5,000:** Subject to a flat logistics fee of **₹250** per order. This fee covers specialized secure packing and partial transit insurance.

3. Authorized Strategic Logistics Partners

To eliminate parcel vulnerabilities, Ornativa operates exclusively through verified, high-security domestic air-express networks. All shipments are explicitly routed through the following premier courier partnerships:

Blue Dart Express

DTDC (Premium/Air)

Delhivery Secure

Under no circumstances do we utilize standard surface mail or unencrypted third-party logistics agents to fulfill jewelry items.

4. Consignment Tracking & Chain of Custody

Immediately upon handover of the parcel to our logistics network, a system-generated dispatch notice is transmitted to the customer's registered email address and mobile contact number. This alert contains a live **tracking link** providing step-by-step transparency as the consignment transitions through sorting facilities and airport terminals.

5. Transit Security, Valuables Insurance & Delivery Verification

Every single consignment leaving our vaults is protected under an exhaustive, multi-risk global transit insurance policy. The coverage initiates at the point of origin and remains fully active until the package is successfully transferred to the customer.

Mandatory Handover Protocols:

- **OTP Verification:** Deliveries require a One-Time Password (OTP) validation delivered to the registered phone number before physical release.
- **No Drop-Offs:** Courier partners are legally restricted from leaving parcels at front desks, with security guards, or with neighbors without express written consent.
- **Tamper Assessment:** Customers are directed to inspect the outer structural integrity of the tamper-evident security bag before accepting. If any punctures, unsealed lines, or moisture damages are apparent, refuse the shipment immediately and notify support.
